

Ashland launches iSolve™ pharmaceutical customer portal

August 2, 2023

Wilmington, Del., August 2, 2023 - Ashland has launched iSolve™ pharma, a pharmaceutical customer portal where customers can easily access robust information about the company's pharmaceutical offerings and other important related business material such as our most recent innovations, literature, product, and regulatory data sheets and more.

"This portal is the result of our focus on customer relationships," said Brandt Giffin, senior director, strategic marketing and new business development, Life Sciences, Ashland. "The portal's value is deeply rooted in product detail, technical, regulatory, sampling, and connectivity to our website and other applications. Preliminary testing with customers indicated a high satisfaction level with the portal: we are making important information available with just a few mouse clicks."

The new iSolve™ pharma customer portal is designed with the needs of the Ashland Life Sciences customer in mind. At a high level, the portal will:

- provide simple, comprehensive search access to product data
- display and allow downloads of important regulatory documents
- allow access to technical and marketing information, along with a connection to Ashland expert solvers
- allow sample requests to be entered quickly

The portal is available through [Ashland.com](https://www.ashland.com) after initial registration, and pharmaceutical customers can search the portal by product name, market segment, application, or process.

About Ashland

Ashland Inc. (NYSE: ASH) is a global additives and specialty ingredients company with a conscious and proactive mindset for environment, social, and governance (ESG). The company serves customers in a wide range of consumer and industrial markets, including architectural coatings, construction, energy, food and beverage, nutraceuticals, personal care, and pharmaceutical.
