

Ashland Inc. Reports March Quarter Earnings

COVINGTON, Ky., April 26 /PRNewswire-FirstCall/ -- The following was issued today by Ashland Inc. (NYSE: ASH):

(Logo: http://www.newscom.com/cqi-bin/prnh/20040113/ASHLANDLOGO)

Fiscal 2004: Second quarter highlights

- A 10-percent increase in sales revenues and a lower overall cost structure contributed to improved operating income from wholly-owned businesses compared to the previous winter quarter:
 - Each of the Chemicals sector divisions achieved record March quarters - results from Ashland Distribution nearly tripled, Ashland Specialty Chemical nearly quadrupled and Valvoline was up 33 percent;
 - In the Transportation Construction sector, Ashland Paving And Construction reduced its quarter-over-quarter operating loss by 42 percent.
- Higher manufacturing and crude oil costs resulted in lower profits from refining and marketing.
- On March 19, 2004, Ashland announced an agreement to transfer its 38-percent interest in Marathon Ashland Petroleum LLC (MAP) to Marathon Oil Corporation, subject to previously disclosed conditions.

Ashland Inc. today reported a net loss of \$16 million, or 23 cents a share, for the quarter ended March 31, 2004, the second quarter of the company's 2004 fiscal year. These results compared to a net loss of \$39 million, or 57 cents a share, for the second quarter of 2003. Ashland's loss from continuing operations for the second quarter of 2004 amounted to \$11 million, or 16 cents a share, compared to a loss of \$37 million, or 54 cents a share, for the quarter a year ago. As previously disclosed, the difference between net income and income from continuing operations relates principally to ongoing quarterly charges of nearly \$5 million for asbestos liabilities. The winter quarter is typically Ashland's weakest due to the seasonality of our businesses.

For the six months ended March 31, 2004, Ashland reported net income of \$17 million, or 25 cents a share, compared to a net loss of \$131 million, or \$1.91 a share for the same period last year. Ashland had income from continuing operations of \$27 million, or 39 cents a share, for the 2004 period, compared to a loss of \$38 million, or 56 cents a share, for the 2003 period.

Performance from the Chemicals sector, which consists of the Ashland Distribution, Ashland Specialty Chemical and Valvoline divisions, continued to improve. March quarter operating income for the sector totaled \$62 million, compared to \$30 million for the 2003 quarter.

Ashland Distribution achieved a record March quarter with operating income of \$19 million compared to \$7 million in 2003. Improved customer service capabilities, increased operating efficiency and effective cost management have enabled Ashland Distribution to improve daily sales volumes by 3 percent compared to the 2003 quarter. For the first six months of fiscal 2004, operating income more than doubled to \$32 million compared to \$15 million last year.

Ashland Specialty Chemical reached record operating income of \$19 million for the March quarter compared to \$5 million in 2003. Slight margin pressure was more than offset by higher sales and the division's reduced cost structure. Sales per

shipping day increased by 7 percent. For the first six months of fiscal 2004, operating income was \$42 million, a 133-percent improvement over last year.

Valvoline reported record March quarter operating income of \$24 million, a 33-percent increase from the 2003 quarter. Valvoline's core lubricant business improved with premium product sales volumes increasing 5 percent. Valvoline Instant Oil Change (VIOC) increased non-oil change revenues by 6 percent and premium lubricant oil changes by 3 percent. Valvoline's international operations improved due in large part to a 4-percent increase in lubricant sales volumes and strengthening foreign currencies. Additionally, Valvoline achieved record operating income of \$45 million for the first six months of fiscal 2004, compared to \$32 million last year.

The Transportation Construction sector, consisting of Ashland Paving And Construction, Inc. (APAC), experienced an anticipated loss for the quarter of \$33 million. In addition to its lower cost structure, APAC instituted a program to mitigate winter losses, contributing to its ability to lower by 42 percent the operating loss reported in the prior year's quarter. Looking ahead to the summer construction season -- during which APAC has historically reported the majority of its earnings -- the division has continued to increase its construction backlog, or jobs awarded but not yet completed. APAC increased the backlog by 5 percent to a record \$1.9 billion as of March 31, 2004.

Operating income from refining and marketing was \$2 million compared to \$21 million for the March 2003 quarter. MAP completed a substantial amount of planned refinery maintenance during the quarter and expects to run at full capacity moving into the spring driving season. In addition, MAP completed a number of other projects such as a multi-year improvement project at its Catlettsburg, Ky., refinery and a 13,000 barrels per day (bpd) expansion of the crude oil processing unit at its Garyville, La., refinery. The latter project increased MAP's overall crude oil capacity from 935,000 bpd to 948,000 bpd. Ashland's costs for this line of business were unusually high due to mark-to-market charges on margin hedges and to transaction costs associated with the proposed transfer of MAP to Marathon Oil Corporation.

On March 19, 2004, Ashland announced that the company signed an agreement under which it would transfer its 38 percent interest in MAP and two other businesses to Marathon in a transaction structured to be tax free and valued at approximately \$3 billion. The two other businesses are Ashland's maleic anhydride business and 61 Valvoline Instant Oil Change centers. The transaction is subject to several previously disclosed conditions, including approval by Ashland's shareholders, customary antitrust review, consent from public debt holders and receipt of a favorable private letter ruling from the Internal Revenue Service with respect to the tax treatment. While there is meaningful risk that the transaction will not receive the favorable ruling from the IRS, in which case the transaction would not close, Ashland believes it is more likely than not that this transaction will receive a favorable ruling. If the conditions are met, the transaction is expected to close by the end of the 2004 calendar year.

"I am pleased by our performance during the first six months of fiscal 2004," said James J. O'Brien, chairman and CEO. "We are demonstrating Ashland's ability to build and maintain strong relationships with our customers and suppliers and to seize opportunities in an improving economy. With a lower cost structure, we are able to focus on organic growth. Record March quarter results from Ashland Distribution, Ashland Specialty Chemical and Valvoline indicate that our plan to drive efficiency, manage capital and grow value-creating businesses is working. We look forward to further executing our plans during the second half of this year."

Today at 11:00 a.m. (EDT), Ashland will provide a live audio webcast of its quarterly conference call with securities analysts. The webcast will be accessible through Ashland's website, www.ashland.com. Following the live event, an archived version of the webcast will be available on the Ashland website at www.ashland.com/investors for 12 months. Minimum requirements to listen to the webcast include the free Windows MediaPlayer software and a 28.8 Kbps connection to the Internet.

Ashland Inc. (NYSE: ASH) is a Fortune 500 transportation construction, chemicals and petroleum company providing products, services and customer solutions throughout the world. To learn more about Ashland, visit www.ashland.com.

Forward-Looking Statements

This news release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include those that refer to Ashland's operating performance, earnings and expectations about the MAP transaction. Although Ashland believes its expectations are based on reasonable assumptions, it cannot assure the expectations reflected herein will be achieved. These forward-looking statements are based upon internal forecasts and analyses of current and future market conditions and trends, management plans and strategies, weather, operating efficiencies and economic conditions, such as prices, supply and demand, cost of raw materials, and legal proceedings and claims (including environmental and asbestos matters) and are subject to a number of risks, uncertainties, and assumptions that could cause actual results to differ materially from those we describe in the forward-looking statements. The risks, uncertainties, and assumptions include the possibility that Ashland will be unable to fully realize the benefits anticipated from the MAP transaction; the possibility of failing to receive a favorable ruling from the Internal Revenue Service; the possibility that Ashland fails to obtain the approval of its shareholders; the possibility that the transaction may not close or that Ashland may be required to modify some aspect of the transaction to obtain regulatory approvals; and other risks that are described from time to time in the Securities and Exchange Commission reports of Ashland. Other factors

and risks affecting Ashland are contained in Ashland's Form 10-K for the fiscal year ended Sept. 30, 2003, as amended, filed with the Securities and Exchange Commission (SEC) and available in Ashland's Investor Relations website at www.ashland.com/investors or the SEC's website at www.sec.gov. Ashland undertakes no obligation to subsequently update or revise the forward-looking statements made in this news release to reflect events or circumstances after the date of this release.

⁽a) Includes APAC's proportionate share of the backlog of unconsolidated joint ventures.

⁽b) Total construction job revenues, less subcontract costs.

⁽c) Sales are defined as sales and operating revenues. Gross profit is defined as sales and operating revenues, less cost of sales and operating expenses, and depreciation and amortization relative to manufacturing assets.

⁽d) Amounts represent 100% of MAP's operations, in which Ashland owns a 38% interest.

- (e) Total average daily volume of all refined product sales to MAP's wholesale, branded and retail (SSA) customers.
- (f) Sales revenue less cost of refinery inputs, purchased products and manufacturing expenses, including depreciation.
- (g) Effective January 1, 2003, SSA adopted EITF 02-16, "Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor," which requires rebates from vendors to be recorded as reductions to cost of sales. Rebates from vendors recorded in SSA merchandise sales for periods prior to January 1, 2003 have not been restated and included \$46 million in the six months ended March 31, 2003.
